SUMMARY

Results-driven Computer Science student with strong practical experience in full-stack web development, IoT solutions, and software systems. Proficient in MERN stack, Python, and C++ with a solid foundation in Data Structures, Algorithms, and database design.

EDUCATION

Institute of Technology & Management, Gwalior

2023 – 2027

Bachelor of Technology (B.Tech) in Computer Science & Engineering

CGPA: 6.6 / 10

TECHNICAL SKILLS

Languages:	C, C++, Python, JavaScript, PHP, Java (DSA)
Web Development:	HTML5, CSS3, Bootstrap, React.js, Node.js, Express.js, REST APIs
Databases & Cloud:	MySQL, MongoDB, Firebase, JSON
Tools & Libraries:	Git, GitHub, VS Code, Postman, NumPy, Pandas, OpenCV
Core Concepts:	Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, IoT

EXPERIENCE

Web Development Intern

July 2025 – Present

Evolve X

- Contributed to full-stack development using the **MERN stack** (MongoDB, Express.js, React.js, Node.js), delivering multiple functional modules.
- Developed and integrated robust **REST APIs**, enabling efficient frontend-backend communication for dynamic features.
- Resolved **15+ bugs** and implemented user-centric UI/feature improvements based on testing feedback and code reviews.
- Managed version control using Git/GitHub across **30+ commits** and maintained structured feature branches.
- Optimized database queries and indexing, improving query response times by **~20–30%** in key modules.

PROJECTS

Smart Car Parking System with Route Guidance

Apr 2024 – Aug 2024

Tech Stack: C/C++, Node.js, Express.js, MongoDB, ESP8266 (Microcontroller), REST APIs

- Developed an IoT-based smart parking system to track and display real-time slot availability for 10+ parking slots.
- Engineered LED-based dynamic route guidance, reducing average parking search time by **~30–40%**.
- Integrated hardware sensors and microcontrollers with cloud backend, achieving **~90%+ detection accuracy**.

Academic & Study Material Portal

Jan 2026 – Apr 2026

Tech Stack: HTML5, CSS3, JavaScript, Bootstrap, PHP, MySQL

- Engineered a responsive study material portal allowing students to access syllabus notes, important questions, and previous year papers.
- Designed a clean, subject-wise navigation flow and relational database schema for streamlined document retrieval.
- Optimized frontend assets and database indexing to deliver seamless performance across desktop and mobile screens.

Automated Data Cleaning & File Management Tool

July 2025 – Nov 2025

Tech Stack: Python, Hashing (MD5/SHA), OS Module, File Handling

- Built a Python-based utility to automatically detect and eliminate duplicate, junk, and temporary files, optimizing storage efficiency.
- Implemented cryptographic hash-based duplicate detection, identifying and handling **100+ duplicate files** per scan.

- Created automated categorization rules and age-based file purging (>30 days), reducing manual organization time by ~**20–30%**.

CERTIFICATIONS & EXTRACURRICULAR

- **Competitive Programming:** Actively solving Data Structures & Algorithms problems on LeetCode & GeeksforGeeks.
- **Foundations:** Completed comprehensive coursework in Web Development, Database Management, and Object-Oriented Design.
